

## Introduction to YAWEI

Jiangsu Yawei Machine Tool Co. Ltd

Having developed metal working equipment for more than a half century, Jiangsu Yawei Machine Tool Co. Ltd has a manufacturing & design facility of more than 200,000m<sup>2</sup> and assets of more than RMB 200 million yuan. Being the first in China to manufacture press brakes and shearing machines, Jiangsu Yawei took the lead in China's growing metal working market by developing coil metal processing lines and selling its first de-coil-level-slitting -shear line in early 1990.

Jiangsu Yawei continued to actively look for the joint ventures with other world-class manufacturers of metal processing equipment. Today, Jiangsu Yawei Machine Tool Co. Ltd has numerous joint ventures with companies like, Sino-Swiss Jiangsu EPT Metal Forming Machine Tool Co. Ltd and Sino-Italy Jiangsu Yawei Selema Coil Line Processing Co Ltd.

Sino-Swiss Jiangsu EPT Metal Forming Machine Tool Co. Ltd is a joint venture by Yawei and SMS Co. of The Netherlands. This company specializes in manufacturing CNC press brakes, CNC shears and CNC punches. SMS Co. is a well-known world-class company providing expert press brake and shear designs to many manufacturers famous in Europe. The joint venture with SMS provides Yawei with press brakes and shear technologies of world-class design, patents and streamlined manufacturing and quality benefits. This successful joint venture has consolidated Yawei branded press brakes and shears as the top commercial brand in China.

Sino-Italy Jiangsu Selema Coil Lines Processing Co. Ltd manufactures coil metal processing machinery such as CNC de-coil-level-shear lines and CNC slit-recoil lines. The Italian investor, SELEMA Co, has been researching and developing de-coil lines for more than 50 years. Being experts in R & D and manufacturing of coil metal processing machinery, they have completed major projects that have provided large, coil metal processing lines for the car industry such as Volkswagen of Germany as well as other major industry users.

SELEMA products are sold all over the world and enjoy a high reputation for quality and reliability. Yawei-China and Selema-Italy combined to make a strong corporation helping Yawei to attain leadership position in the sheet & coil metals processing machinery for the Chinese market.

New joint ventures continue to be a high priority for future growth – today Sino-Japan Corporation, a joint arrangement between Yawei-Nisshinbo for the development of CNC turret punch presses continues to grow. NISSHINBO, a world-famous manufacturer of superior CNC turret punch, combined with Yawei has developed punching products for the Chinese market. Yawei and Nisshinbo have established a close working relationship adopting advanced technologies, new designs and component parts from Nisshinbo, which provide for the manufacturing of a first-class and high -quality CNC turret punch press for the world market.

From March 2004, CNC press brakes and shears manufactured by Yawei have begun to be exported to Europe and USA, thus indicating the high level of quality and reliability that has been achieved by Yawei's products and their acceptance in international market.

With aggressive leadership, open minded thinking and a pioneering spirit, Jiangsu Yawei will continue to do research and developing of top-grade products, increasing the effort for new opportunities, endeavoring harder to increase the domestic and international market size and laying a strong foundation for forging out a world famous brand recognition for Yawei products in the world.
